Cottonwood-Gooseberry Irrigation Company
c/o Mr. Lee Mower, President
Fairview, Utah

Dear Mr. Mower:

Re: Diversions from Fairview Lakes

A representative from this office examined the measuring devices on your diversions of water from Fairview Lakes on Thursday, July 22, 1965 and found that your company was diverting approximately 2.0 c.f.s. of water through the tunnel and you had not as yet complied with our request of July 15, 1965 to complete the required changes on the temporary weirs that will insure accurate measurements of water.

The following items must be fulfilled if you intend to continue diverting any water through the tunnel.

1. You are ordered to have the temporary weirs reconstructed within five days so that they will give an accurate water measurement.
2. In order to comply with the recent order of the court, you are hereby ordered to have installed within 30 days the required continuous volumetric recording devices.

If the above-mentioned items are not fulfilled as set out, you will be ordered to desist from diverting any water through the tunnel.

Yours very truly,

Robert G. Lambert
